End-to-end process flow

Reporting & Analytics Across All Stages — inoBrix Custom — Arrival / departure • Weights • Loading • Quality / CoA • PGI timestamps

Legend

SAP Standard | Configured SAP | inoBrix Custom | External / Physical | Proposed / to validate

SAP Standard: native capability | Configured SAP: tailored standard capability | inoBrix Custom: solution-specific code and integrations

Indicative classification — confirm SAP scope, configuration and custom implementation before publication.
SAP Standard assumes the relevant modules are deployed. Carrier detail updates and signature implementation require validation.
